OUR AGRICULTURAL PRODUCTION POLICY

- Global G.A.P. - Fulfilling the requirements of good agricultural practices
- Using modern agricultural tools and equipment in the production process, from the meeting of the seed with the soil until the product is shipped,
- To carry out planned and sustainable production in accordance with local legislation and international standards, by protecting the soil flora and fauna without disturbing the ecological structure, in order to meet the need for food raw materials,
- To ensure absolute compliance with the period between application and harvest in the use of pesticides and to keep the amount of residue at a minimum level,
- To take necessary hygiene measures, especially during the harvest phase, for safe food production,
- To provide necessary training to agricultural production employees,
- To ensure continuous improvement and development,
- To give importance to occupational health and safety practices,
- And to meet our company's needs on time based on fresh, clean raw material production and traceability.
