

01.06.2022

OUR ENVIRONMENTAL POLICY

- To comply with existing laws and regulations by monitoring environmental publications,
- To keep environmental pollution under control by minimizing it within the framework of the principle of preventing pollution at its source, together with the environmental management system,
- Being aware of our impact on climate change and aiming to minimize our use of natural resources, especially energy and water, waste, water emissions, and air emissions, which have an impact on the environment,
- Working to reduce our greenhouse gas emissions and other emissions,
- To keep our environment clean and safe by trying to prevent the waste generated as a result of our activities at the source, re-evaluating, recycling, or, if not possible, disposing of them in accordance with the legislation,
- To recycle our wastewater or, if not possible, to discharge it in accordance with legal requirements,
- To accept the training of our employees and the awareness of our stakeholders as a basis.
